THE COMMITTEE OF VISITORS
1946-47

Chairman :
MAJOR D. G. ASTLEY, C.B., D.L., The Cottage, Wroxham, Norfolk.

Vice-Chairman :
H. E. TAYLOR, J.P., Cringleford, Norwich.

SIR HENRY E. S. UPCHER, J.P., Sheringham Hall, Norfolk (*Chairman of County Council*).

E. G. GOOCH, ESQ., M.P., Rydal Mount, Wymondham, Norfolk (*Vice-Chairman of County Council*).

G. W. BECK, J.P., Winterton Old Manor House, Great Yarmouth.

LT.-COL. J. F. BARCLAY, O.B.E., J.P., Scarning Dale, Scarning, Norfolk.

MISS M. COZENS-HARDY, M.B.E., J.P., Oak Lodge, Sprowston, Norwich.

H. C. DAVIES, Caistor Old Hall, Norwich.

F. H. EASTON, The Villa, Bunwell, Norfolk.

SIR STEPHEN GREEN, BART., Ken Hill, Snettisham, Norfolk.

G. E. HEWITT, J.P., St. Faith's, Norwich.

W. HOWES, J.P., "Sunniva," Swaffham.

COLONEL V. N. LOCKETT, The Cottage, Framingham Pigot, Norwich.

COLIN McLEAN, "Humbletoft," Sandy Lane, East Dereham.

REV. W. E. C. PARTRIDGE, 16, Victoria Terrace, Lowestoft.

S. PEEL, J.P., Mill Road, Wells, Norfolk.

C. C. SMITH, 10, Belmore Road, Thorpe, Norwich.

Clerk to the Committee :
B. H. READ, F.H.A., St. Andrew's Hospital.

OFFICERS OF THE HOSPITAL
1946

Medical Superintendent :
W. J. McCULLEY, M.B., Ch.B., B.Sc. (Glasgow), D.P.M. (Eng.)

Deputy Medical Superintendent :
J. W. WISHART, M.R.C.S. (Eng.), L.R.C.P., M.B., B.S. (London), D.P.M. (Eng.).

Assistant Medical Officers :
A. J. F. CROSSLEY, M.B., Ch.B. (Manchester), M.R.C.S. (Eng.), L.R.C.P. (Lond.), D.P.M. (Eng.)
F. BLAKE, M.R.C.S. (Eng.), L.R.C.P. (London) (Temporary).

Honorary Visiting Surgeon :
C. NOON, O.B.E., F.R.C.S. (Eng.).

Honorary Visiting Physician :
H. J. STARLING, M.D., (Lond.).

Dental Surgeon :
G. SAMBROOKE STURGESS, L.D.S., R.C.S. (Eng.).

Chaplain :
REV. C. D. PROUD.

Treasurers :
BARCLAYS BANK, LTD., NORWICH

Secretary :
B. H. READ, F.H.A.

Steward :
T. E. PARRY, F.H.A.

Engineer and Clerk of Works :
H. J. WYATT.

Matron :
MISS M. E. GIBBS.

Chief Male Nurse :
P. G. KEEBLE

ANNUAL REPORT
OF
THE COMMITTEE OF VISITORS

In accordance with section 190 of the Lunacy Act 1890, we beg to submit the following Report for the year 1946.

There were resident in the Hospital on 31st December, 1946, the following patients :—

	Male.	Female.	Total.
Norfolk	396	663	1059
Service	41	—	41
Ex-Service	1	—	1
Ministry of Pensions ...	2	1	3
Out-County	6	23	29
	446	687	1133

In comparison with the numbers resident on 31st December, 1945, these figures show an increase of 22 males and 38 females.

The number of beds provided in the Hospital, based upon the most recent return to the Board of Control, is 526 male and 644 female; total 1170. The occupation under the Emergency Hospitals' Scheme of wards comprising 151 beds has caused considerable overcrowding amongst mental cases. 13 beds were released, leaving 138 still in use at the end of the year.

The number of new patients admitted during 1946 rose very sharply, and was most marked amongst the voluntary cases. The total of 348 patients admitted constituted a record in the history of the Hospital.

	Voluntary.	Temporary.	Certified.
1945. Direct Admissions	111	1	116
1946. Direct Admissions	210	5	133

The recovery rate, calculated upon the direct admissions, was 33% for males, and 37.2% for females, or 35.6% for both sexes.

The percentage of total discharges, similarly calculated, was 54.9 for males, and 65.6 for females, or 62.9 for both sexes.

The need for a modern admission unit becomes more marked. The increase in the number of early cases of mental disorder admitted during the year through Out-Patient Clinics and the developments in methods of treatment, emphasise the inadequacy of the present accommodation.

Two Commissioners of the Board of Control visited the Hospital on 5th February, and, having regard to the adverse conditions under which the Hospital has functioned during the past seven years, their report was satisfactory.

Some progress has been made during the year in re-decorating wards and in outside painting and repairs, but this work was hampered by shortage of materials. It will be some considerable time before the arrears which accumulated during the war period can be overtaken.

The excess weekly charge for Out-County and Private Patients amounted to £880 11s. 8d. for the year under review. This sum has been transferred to Building Account for expenditure on Ordinary Repairs.

The weekly rate of maintenance for Norfolk patients remained at 35/- for the first nine months, but was reduced to 34/5 as from 1st October.

The usual monthly meetings of the Visiting Committee and Sub-Committees have been held, and regular visits of inspection to the wards and other departments have been made by individual members.

Dr. W. J. McCulley took over his duties as Medical Superintendent on 1st April.

Mr. J. Middleton, Secretary and Clerk to the Committee, who had served the Hospital for 34 years, retired on superannuation on 18th April. We have appointed as his successor Mr. B. H. Read, who took up his duties on 12th June.

The difficulty of obtaining new entrants to the female staff has continued, and is most marked in connection with nurses, although extensive efforts have been made both by advertising and in conjunction with the Ministry of Labour and National Service to remedy the position. During the year the care and nursing of female patients was carried on with only 50% of the normal complement of nurses, which has resulted in considerable overtime and undue strain falling upon those concerned. In the domestic department the position has improved slightly.

It is now regarded as very necessary that the erection of a new Nurses' Home which was deferred during the war years, should be proceeded with. In comparison with other hospitals, the nurses' quarters are much below standard, and this fact handicaps still further the task of maintaining an adequate staff.

Notwithstanding these and other difficulties, the work of the Hospital has been well maintained and even extended. We consider that the efforts of the Officers and Staff are worthy of commendation.

(Signed) D. G. ASTLEY,

Chairman.

THE MEDICAL SUPERINTENDENT'S ANNUAL REPORT

For the Year 1946

To the Committee of Visitors

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour to submit to you the Annual Report for the year ending 31st December, 1946, being the 127th since the opening of the Hospital in 1814.

The following table shows the numerical changes which have taken place during the year :—

	M.	F.	Total.
Numbers in the Hospital on 1st January, 1946 ...	424	649	1073
Admitted during the year	136	223	359
Discharged and Transferred during the Year :—			
Recovered	44	80	124
Relieved	27	53	80
Not Improved	8	15	23
Total Discharges and Transfers ...	79	148	227
Died	35	37	72
Remaining in the Hospital, 31st December, 1946 :—			
Norfolk Cases	396	663	1099
Out-County Cases	6	23	29
Service Cases	43	1	44
Ex-Service Cases	1	—	1
Total	446	687	1133

The daily average number resident was 426 men, 661 women, 1087 total. The total number under treatment was 1432.

Admissions.

The number of patients admitted during the year was 136 males and 223 females, as compared with 83 males and 152 females in the previous year, and exceeds by 41 the previous record figure in 1903.

Voluntary and Temporary Patients.

During the year 88 male and 132 female Voluntary patients (including re-gradings to the Status) were admitted, these numbers being 64.7% and 59.2% of the total male and female admissions respectively. Six Temporary patients were admitted during the year.

Of the Voluntary cases there has been an increase of 102 admissions or 86.4% compared with the previous year.

Of the total number of direct admissions (348) 71 patients were over 65 years of age.

Discharges and Transfers.

The condition of patients on discharge and transfer was as follows:—

	Male.	Female.	Total.
Recovered	44	80	124
Relieved	27	53	80
Not Improved	8	15	23

The Recovery Rate, calculated on direct admissions was 33.0% for males and 37.2% for females, or 35.6% for both sexes.

Deaths.

The total number of deaths was 35 males and 37 females; the death rate calculated on the average daily number resident was male 8.2%, female 5.6%; 6.6% total. Of these 23 males and 24 females were over 65 years of age. Tuberculosis was the cause of death in the case of 4 men and 2 women, and cancer in the case of 4 men and 3 women.

Inquests.

Two inquests were held during the year. The first, in the case of a female patient, aged 42 years, who died from poisoning after an overdose of aspirin, self administered in her own home, prior to admission. The second, a male voluntary patient, died whilst on seven days leave, his relatives having insisted on taking him home in defiance of medical advice.

Casualties.

During the year nine serious casualties occurred. These included, fracture of both bones of left wrist; fracture of the 3rd and 4th metacarpals, a rt. Colles fracture; dislocation of the left shoulder; fracture of the rt. wrist; fracture of the lower end of fibula; a rt. Colles fracture, a left Colles fracture, and a rt. Colles fracture.

Accommodation.

The number of beds provided in the Hospital based on the most recent return to the Board of Control is as follows:—

	Male.	Female.	Total.
Numbers on Registers 31st December, 1946 ...	446	687	1133
Accommodation ...	414	573	987
Deficiency	32	114	146

During the year Male Wards D, E, F, and G, were occupied again after redecoration, but Male Ward C was still retained by the Emergency Hospital Service, so that there is still some overcrowding. Female Wards 11 and 12 were also redecorated, but owing to the shortage of staff, were only gradually brought into use again.

Health of Patients.

In spite of the overcrowding, the general health of the patients was very satisfactory. Only three cases of Paratyphoid, sixteen cases of Dysentery, mostly of a mild type, occurred during the year. There were also seven fresh cases of Pulmonary Tuberculosis. The improvement in ventilation brought about by the removal of the "black out," together with reasonably good diet, are largely responsible for the reduced incidence of Tuberculosis. Verandah space for the nursing of male cases is greatly needed. The extention of central heating throughout the Male and Female Hospital would greatly add to the health and comfort of the patients.

Treatment. During the year thirty-seven patients were given Electro-Convulsive Treatment, and of these 28 were discharged. The treatment was also given to six out-patients. Continuous Narcosis was used in thirty cases, of whom twenty one were discharged. Narco-analysis under Pentothol was used in four cases.

Owing to the shortage of medical and nursing staff it has not yet been possible to introduce Insulin Shock Treatment and facilities for carrying out the operation of Leucotomy are still lacking, but one patient was transferred to Runwell Hospital for this treatment.

Malarial Therapy in conjunction with Tryparasamide was used in three cases.

During the year eight major operations were performed by the Consulting Surgeon.

Laboratory. A summary of the work done in this department is given below. The demands made by the Emergency Hospital Services Section showed a marked reduction, but were still heavy.

BLOOD: Counts of red and white corpuscles 875; estimations of hæmoglobin 282;Agglutinations of enteric dysentery food poisoning organisms 390; Kahn precipitation tests 433; Urea estimations 37; Groupings and matchings 19; Sedimentation rate of red corpuscles 197; search for malarial parasites 66; Corpuscular volume 197; Reticulocyte and platelet counts bleeding and coagulation time 12; other examinations 284.

CEREBRO-SPINAL FLUID: Culture for organisms 17; Cytological and microscopical 52; Chemical examinations 86; Kahn Tests 16; Lange Goldsol curves 18; Examinations for presence of T.B. 31.

THROAT SWABS, ETC.: Microscopical and cultural examinations 244.

FÆCES: Cultural examinations 371; microscopical examinations 138; chemical examinations 49; presence of worms 25; estimation of fat content 3.

GASTRIC JUICES: Estimation of acids 309; chemical examinations 748; other examinations 5.

SPUTUM: Microscopical and cultural examinations for T.B. 161.

PUS AND OTHER BODY FLUIDS: Microscopical and cultural examinations 99.

URINE: Cultural examinations 64; Microscopical examinations 746; Sugar estimations 162; Urea estimations 14; Chemical examinations (qualititive) 4316; urinary diastase 2; other examinations 10.

MISCELLANEOUS: Including glucose tolerance curves, "hetero-agglutination" tests, fragility of red corpuscles, mantoux tests, sections, penicillin sensitivity tests, etc., 143.

Examinations performed ...	...	5894	... Mental
,, ,, ...	...	4698	... E.H.S.
		10,592	... Total

Dental Department.

Mr. G. Sambroke Sturgess, L.D.S., continues to visit the Hospital weekly, and details of the work carried out are submitted. There is need, however, for more use of conservative forms of treatment.

	Staff	Patients M.	Patients F.	Patients T.
Number of cases examined	17	181	165	363
,, ,, ,, treated	17	99	78	194
,, ,, Extractions L.A. ...	23	136	70	229
,, ,, Extractions G.A. ...	—	33	139	172
,, ,, Admins. G.A. ...	—	5	8	13
,, ,, S. & P.	—	2	2	4

Occupational Therapy.

Restricted supplies of material and lack of staff continued to limit the work of this department, and in spite of repeated advertising, no suitably qualified person was obtained until the very last week of the year. Nevertheless, beneficial use was made of the available resources, an average of 22 males and 87 females being employed daily. The average number usefully employed in all sections of the Hospital was 60% males and 60% females.

Entertainments.

The weekly cinema show is still the regular entertainment, and has been improved by the inclusion of a news reel. In addition, there has been a concert in most of the autumn and winter months. The usual motor coach trips were run in August and September, and were enjoyed by some three hundred patients.

Parole.

The granting of parole has been further extended, and a large number of patients enjoy the privilege as shown :—

	Male.	Female.	Total.
Full Parole	45	35	80
Partial Parole	70	113	183

V-Day Celebrations.

This was observed in June by the provision of a special Cinema Show and a special Dinner for the patients. A gift of cigarettes was made to each of the Female Staff.

Welcome Home Dance.

A Welcome Home Staff Concert and Dance was held in June. A gift of money to nineteen members of the staff and families was made from the Postwick Annexe Fund.

Out-Patient Clinic.

The work of the Clinics has steadily increased, and two sessions are now held at the Norfolk and Norwich Hospital and one at the West Norfolk and King's Lynn General Hospital each week.

Particulars of the numbers of cases and attendances are given below :—

	Norfolk & Norwich			King's Lynn			Total	
	M.	F.	Total	M.	F.	Total	M.	F.
Number of Patients treated ...	55	70	125	8	4	12	63	74
Number of attendances ...	122	106	228	15	4	19	137	110

Compared with the previous year, this is an increase of 71% and 38% respectively.

Visit of the Commissioners of the Board of Control.

Two Commissioners of the Board of Control visited the Hospital on the 4th and 5th February, 1946.

Dr. A. T. W. Forrester, Headquarters Inspector of the Ministry of Pensions, visited the Hospital on the 4th September, 1946.

Staff.

Mr. J. Middleton, who had held the office of Clerk of the Hospital for thirty-four years and that of Clerk to the Committee since 1933, retired in April. Mr. B. H. Read, Deputy Clerk and Steward of Winson Green Hospital, Birmingham, and formerly a member of the staff of this Hospital, was appointed to succeed him and took up his duties in June.

Dr. J. W. Wishart, Senior Medical Officer, Cheddleton Mental Hospital, Staffordshire, was appointed Deputy Medical Superintendent, and commenced duty in July. Dr. D. G. Colville left in July to take up an appointment as Assistant Medical Officer at Brentwood Mental Hospital, Essex. The vacancy so caused was filled by the appointment of Dr. F. Blake as Temporary Medical Officer.

Miss Angela Donlon, who was appointed Senior Assistant Matron and Sister Tutor, left in May on obtaining another post. No successor was obtained until December, when Miss A. Aves was appointed.

Mr. H. W. Pull was promoted to be Assistant Chief Male Nurse. Miss Claire McManus, who was appointed Warden of the Nurses' Home in April, left in September to take up a similar post at Bristol, and the post remained vacant during the rest of the year. Miss M. Croggan was appointed Occupational Therapist, and took up duty on the 28th December.

Mr. G. H. Ward, Second Assistant Secretary, resigned in August on his appointment as Deputy Clerk and Steward at Cardiff City Mental Hospital, and he was succeeded by Mr. J. P. Martin from Brighton Mental Hospital.

The need for a Psychiatric Social Worker has been fully realised, but in spite of continuous advertising, the post remained unfilled.

The difficulties caused by lack of Female Nursing and Domestic Staff continued throughout the year. The total number of Female Nurses never exceeded fifty-five, and at times was as low as forty-seven. Twenty-three female Student Nurses were engaged, but thirteen left during the year.

The remainder of the Male Nursing Staff still serving with H.M. Forces returned during the year. The number of Male Student Nurses engaged during the year was only nineteen, and of these eight left. The small number entering upon training shows how little the Rushcliffe Scale of Salaries has helped to promote the recruitment of nurses for the Mental Hospital Service.

During the year one Male Nurse passed the Preliminary examination of the R.M.P.A., and one Male Nurse passed the Final examination whilst serving in H.M. Forces.

At the end of the year forty-seven Male and twenty Female Nurses were in possesion of the Final Diploma of the Royal Medico-Psychological Association, whilst eight males and nine females had passed the Preliminary examination.

A Nurses' Representative Council was constituted in February and met at intervals during the year.

Mr. Harry S. Warvill, Upholsterer, died in March after a very short illness. His widow was granted an allowance of £204 18s. 10d.

The following retired on Superannuation :—

Mr. W. G. Hall, Assistant Upholsterer, after 22 years' service.

Miss F. Q. Read, Assistant in the Arts and Crafts Department, after 21 years' service.

Emergency Hospital

During the year Ward E was vacated by the Emergency Hospital, which became limited to Ward C with its attached dormitories.

The following are the statistics relating to this Section :—

Numbers Resident 1st January, 1946	...	...	87
Number of Admissions during the year	...	...	1122
Numbers Resident 31st December, 1946	...	...	44

The marked reduction in the number of the patients at the end of the year showed that the work of this Section must soon come to an end, but owing to the lack of accommodation elsewhere, it was not possible to close it. During most of the year the Resident Medical Officers were Dr. J. Kaufman and Dr. E. Jellinek.

In conclusion, I record my thanks to my medical colleagues, to all other Officers and Staff of the Hospital for their loyal service and to the Chairman and Members of the Committee for their help and advice throughout the past year.

I have the honour to be,

Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

W. J. McCULLEY,
Medical Superintendent.

REPORT
OF THE
COMMISSIONERS of the BOARD OF CONTROL

NORFOLK MENTAL HOSPITAL,
ST. ANDREW'S, THORPE,
April 23rd, 1947.

There were yesterday upon the statutory books the names of 1138 patients, or 449 men and 689 women; this total included 43 men in the Service or Ex-Service category. Four men and four women were absent on trial.

Direct admissions during 1946 numbered 348; in 310 cases the patients were received directly from their own homes. Admissions upon a voluntary basis amounted in all to 210, or 60.3 per cent.; 2 men and 4 women were received upon applications for temporary treatment. During the year 22 men and 34 women were allowed out upon trial, money allowances being granted in three cases.

The weekly maintenance charge for home patients is at present 35s. 7d.; that for out-county patients is 42s. 7d.

The established medical staff of the Hospital consists of the Medical Superintendent, his Deputy, and two Assistant Medical Officers; the junior established post is vacant, and is at present filled by a temporary Medical Officer. It is understood that the Senior Assistant Medical Officer will be required for Military Service in July next. The difficulty of replacing him by an officer of equal experience has proved, so far, insuperable. The holding of three out-patient clinics each week at the Norfolk and Norwich Hospital, and of one at King's Lynn, involves the services of all three members of the established staff, in addition to their duties in the hospital itself. The loss of the services of an Assistant Medical Officer of senior rank will, in these circumstances, be very seriously felt.

It has not yet been found possible to secure the assistance of a psychiatric social worker based upon the hospital, who would be available to interview visiting relatives, and to visit the homes of patients before trial or discharge. In the meantime, the National Association for Mental Welfare have placed at the disposal of the hospital the services of one of their workers of this type, who visits from Cambridge any cases that are indicated to her by the Medical Superintendent.

The nursing staff available for the care of the 677 female patients now resident in the hospital consists of 56 nurses employed on whole-time duties, and 32 part-time workers recently recruited as a result of the efforts of the Medical Superintendent. Six voluntary Red Cross helpers have rendered

valuable assistance since the summer of last year; two of these have now been engaged upon a part-time basis. Much depends, of course, upon the time which these new members of the staff are able to devote to their employment, and upon the regularity of their attendance. It is obvious, however, that the relief to a hard-worked permanent staff will be considerable. Upon the male side the situation, as in other hospitals, is somewhat easier, and 76 male nurses are available for the care of 440 men.

An Occupation Officer and two experienced nurses on the female side have made encouraging progress in the Handicrafts Room with about fifty female patients. These included, we were pleased to observe, a number of the more retarded type. Occupation in the wards for such patients (both male and female), when it can be organised, should result in considerable relief to the nursing staff. It might, in particular, be effective in reducing the abnormally high rate of seclusion upon the female side.

One large male ward, capable of reduction into two units and, indeed, requiring such alteration, is still held by the Emergency Medical Service, who also occupy the quarters designed for the Assistant Medical Officers. It is to be hoped that this much needed space will soon become available for its original purpose.

The wards generally were clean and well kept; redecoration is being carried out as labour and materials permit. The care of the ward gardens serving the wards which used them most, that is to say the closed wards, is receiving attention which it was not possible to give during the period of the war.

The dietary appeared to us to be very satisfactory in existing circumstances; a supper meal in every ward issued at 6.30 p.m. breaks the long interval between tea and breakfast. Hot plates in all ward kitchens will, no doubt, be provided when this becomes possible.

The clothing of male and female patients presents problems which are not easy to solve. We thought that those problems upon the whole had been satisfactorily dealt with, but that the appearance of the male suits after washing would be considerably improved by steam-pressing.

We discussed with the Medical Superintendent the question of the re-organisation of the Library, which will be desirable as soon as it can be carried out. It was most encouraging to learn that the supply of daily newspapers in the wards has been doubled at his instance.

There were 72 deaths during 1946 (35 male and 37 female). Two inquests were held; in one case death was due to aspirin taken before admission; in the other, a patient committed suicide when on leave.

There have been 10 accidents and fractures since the last visit. Most of them were due to falls of elderly patients, and no accident calls for comment.

There are several cases of quiescent tuberculosis in the hospital, and it is unfortunate that these are distributed in many wards. This is partly due to over-crowding, but it has not led to an excessive death-rate, 6 patients dying from tuberculosis during the year. The treatment of active cases is satisfactory, and the local Tuberculosis Officer attends when required.

Typhoid continues to be higher on the female side, and there are 9 carriers. The steps taken to isolate these carriers are effective, but attempts to treat them have been, so far, unsatisfactory.

On the male side Dysentery remains a serious problem, and again it has been found impossible to concentrate these cases.

Apart from this, the general health of the patients has been satisfactory, and the care and treatment of the sick appears to be good.

Electro-convulsive treatment is carried out, and it is proposed to start insulin treatment on the male side shortly. A few cases have been sent to Runwell for leucotomy. Intra-thecal penicillin is being tried for general paralysis, but in general this condition is being treated with malaria and intro-muscular penicillin.

We have been much impressed by the progress which has been made in this hospital during the past year in the face of the difficulties which are the legacy of the period of war. Dr. Connell retired last year from the post of Medical Superintendent, after over twenty-five years of service here. To him, and to Dr. McCulley who succeeds him, we extend the good wishes of our Board.

Dr. McCulley has to assist him, as Deputy, Dr. Wishart, and as Assistant Medical Officers, Dr. Crossley and Dr. Blake. To each of them we are indebted for valuable assistance in the course of a most interesting visit.

H. R. GREEN.

E. N. BUTLER.

Commissioners of the Board of Control.
